
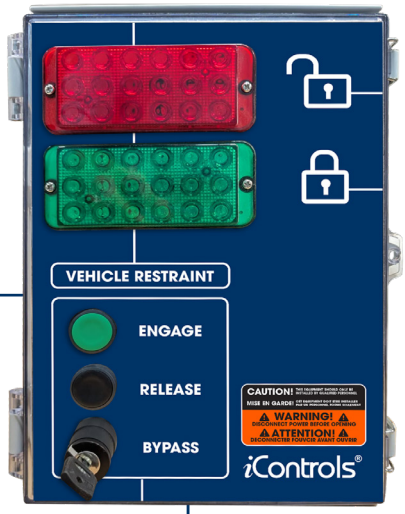
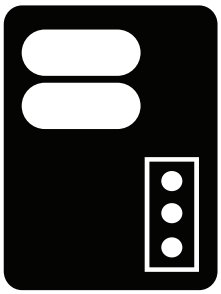
Three-Button Dock Leveler Panel



Vehicle Restraint Panel with Stop and Go LED Light Display

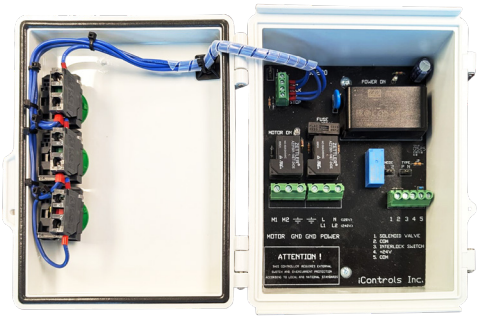
Custom Control Panels for Loading Docks



iControls designs and manufactures control systems engineered specifically for the material handling and loading dock sector.

Our high-performance control panels for dock levelers and truck restraints are purpose built to enhance operational safety, streamline workflows and ensure consistent performance in demanding industrial environments.

We specialize in printed circuit board based control solutions that combine cost efficiency with advanced functionality. These systems are designed to give our customers a competitive edge by delivering reliability with seamless integration and excellent value.



Our panels are fully customizable. Customers can specify the number and configuration of buttons, switches or LED indicators required to meet the needs of their application. Any voltage requirement can also be accommodated.

At iControls, every panel is designed in close collaboration with our clients. We offer both standard branded enclosures and tailored OEM solutions to align with your brand identity and technical requirements

Get in touch with iControls today to discover how our material handling control solutions can support your operations.
